

that employs more than 500 employees. The new offices have been designed by Space and executed by T4. The wide range of products from the leading families within the portfolio of JG (Modul, Adapta Plus, Qbuc and AD) has facilitated the implementation of various solutions to the needs of each job.

Grupo Gubia. Salón de actos del Colegio Retamar. Pozuelo de Alarcón. España.

De la ardua y profunda investigación sobre un material que sigue siendo novedoso en España, el bambú, nace el diseño interior del renovado oratorio y salón de actos del Colegio Retamar. Líder en el diseño y construcción de todo tipo de espacios en madera, se ha encargado de ejecutar a medida todos los revestimientos y carpinterías de un edificio ideado y desarrollado por Artytech2.

Grupo Gubia. The Retamar School Auditorium, Pozuelo de Alarcón, Spain.

As a result of an arduous and profound investigation into a material that is still new in Spain, bamboo, the interior design and renovation of the Auditorium Hall at the Colegio Retamar was based. A leader in the design and construction of all types of rooms made of wood, the Group has been commissioned to manage all coatings and carpentry of a building designed and developed by Artytech2.

Armstrong. Oficinas de la Seguridad Social. San Sebastián. España.

En esta instalación se han utilizado 10.000 m² de techos metálicos Axal microperforados con velo Armstrong, lo que supone la casi totalidad de la edificación. Gracias a ello se ha conseguido solucionar todas las problemáticas relacionadas con la acústica, lo que por un lado proporciona un mayor confort para los usuarios, y por otro la uniformidad de acabados necesaria para posibilitar la versatilidad de la obra.

Armstrong. Social Security offices, Saint Sebastian. Spain.

This facility has used 10,000 m² of AXAL micro-perforated metal roofing with an Armstrong veil, covering almost all the building. As a result it has been possible to solve all the problems relating to noise, which on one hand provides more comfort for users, and on the other it provides the uniformity necessary to enable the versatility of the work.
